

# Molecular Playground Mac Mini Config Details

There are two accounts on the system:

**Full Name:** Molecular Admin

**Short Name:** admin

**Password:** 123science321

This user is an administrator.

**Full Name:** Molecular Playground

**Short Name:** playground

**Password:** ribosome

This user is **not** an administrator. The computer will automatically log in as this user and start the Playground software when the computer (re)boots.

Screen saver, computer sleep, and display sleep are all **turned off**.

Allow power button to put computer to sleep is **off**.

Automatically restart if the computer freezes and start up automatically after a power failure are both **on**.

The dock is set to auto-hide.

The Playground software is located in **/Users/playground/MolecularPlayground**.

If the software needs to be started manually, run **/Users/playground/MolecularPlayground/MPCControlHub.app**. There is a shortcut to this app in the dock.

**Currently, Playground content is stored locally and the software will not make any external internet connections. A near-future update to the software will be available that will allow the content to be loaded from a central (web-based) database.**
